

## **Request for Proposal (RFP) #09 — 2025-08-13**

Scope: Include PBMC isolation, flow cytometry panel with 16 colors (CD3, CD4, CD8, CD45RA, CCR7, IFN $\gamma$ , TNF $\alpha$ , IL-2, etc.), and ELISA for cytokines.

Timeline: 6 weeks from sample receipt; milestones at week 2 and week 4.

Background: Sponsor requests a preclinical immunogenicity study assessing T cell responses to candidate antigen.

Data: Provide sample size justification (power=0.8), expected effect sizes, and statistical plan (ANOVA with post-hoc tests).
